OMEGA® introduces the next generation of our surface-mount fast-response thermocouples. The SA1XL thermocouple achieves response times of less than

Bare sensing element nominal, 0.001" thick.

SA1XL-K-SRTC with mini connector, \$95/5-pack, shown actual size.

Optional Stainless Steel Overbraid for Extra Protection

30 AWG fiberglass lead wire rated to 482°C (900°F).

0.15 seconds. This thermocouple is constructed using a Polyimide/fiberglass-junction insulation along with a fiberglass-insulated lead wire. The SA1XL can be used as a self-adhering thermocouple for temperatures up to 260°C (500°F) or it can be cemented in place for use at temperatures up to 315°C (600°F).

Specifications

Dimensions:

Patch Length: 25.4 mm (1.0")

Patch Width: 9.5 mm (0.375")

Strip Length: 25.4 mm (1.0") with 12.7 mm (0.5") bare wire

AVAILABLE FROM STOCK IN CONVENIENT 5-PACKS!

OMEGABOND®, starts at \$8, see accessory chart or page F-21 for additional information.

The self-adhesive mounting strip is ideal for “targeted” placement of the sensor element. Once the element is in place, it can be used “as is”, for applications such as electronic component temperature monitoring during board fabrication. It can also be cemented in place using OMEGABOND® for higher temperatures.

Tests show that the SA1XL temperature sensor is significantly faster than a typical insulated 30 AWG thermocouple or fine-diameter, metal-sheathed probe.
